Definition of the basic
functionality of the
prototype

INITIAL CATALOGUE OF INSTITUTIONS

the Q2 catalogue of institutional providers was curated, resulting in 324 of 349 valid providers with 46 products for the bulletin board for the Q3 prototype

Database model

DESIGN AND PRELIMINARY IMPLEMENTATION OF PROTOTYPE

the functionality document allowed the back-end team to define the final database model

PROTOTYPE DEFINITION

the full-system functionalities are compiled in a functionality document that details the use cases for four different types of users: registered users, non-registered users, validated institutional users with some data access privileges, and system administrators

A clearinghouse mechanism for the science in Latin America
